Protective Face Shield

The COVID-19 Pandemic has created an urgent need for secondary Personal Protective Equipment (PPE) for use in conjunction with N95 Face Masks, Surgical Masks as well as other fabricated face masks; UTM has modified a field proven PPE design to answer this call.

The Protective Face Shield provides premium personal protection and all day comfort in a lightweight and breathable package. Flip up feature of the face shield makes communication simple and convenient. The ratchet adjustment provides a custom fit while the lightweight, but sturdy chin guard can be removed for increased ventilation or left in place for added protection.

The full face shield design allows for prescription eyewear or sunglasses to be worn while still providing 180 degree visibility. The ample face coverage of the shield also serves to protect against airborne debris and serves as a physical barrier to prevent hands-to-face contact.

The Protective Face Shield is ideal for use by healthcare professionals in conjunction with existing face masks to mitigate splash risks associated with direct patient contact. It also provides a solution for First Responders making contact with the public, workers in warehouse or manufacturing environments, retail settings or any service industry where an additional layer of protection against contact exposure and airborne debris is needed.

The Coronavirus Outbreak reminds us that many viruses, including COVID-19, can be transmitted from surfaces to humans via hand to nose, face or eye contact. Nothing replaces frequent hand washing, but a full face shield that is lightweight, breathable and comfortable to wear all day, along with any number of easily fabricated face mask designs can be an invaluable tool to prevent this kind of hands-to-face contact for anyone shopping, moving around town or in a group setting.

KEY PRODUCT BENEFITS

- Enhanced personalized protective equipment
- Made entirely of high quality plastic
- Full face shield - effective protection against splashes and hands to face contact
- Compatible with N95 face masks, surgical masks, or other fabricated masks
- Easily worn with prescription glasses or sunglasses
- Flip up front for communication, to change N95 mask, or to take a break without removing
- Lightweight, breathable and fully adjustable for a custom fit
- Adjustable headband
- Comfortable - can be worn all day
- Full 180° visibility
- Reusable – Easily cleaned and disinfected for next use
