

TECHNICAL DATA & USAGE SHEET

FACE MASK

Identifiers

Designation: UTM Face Mask

P/N: 69-0304N

Size: One-Size fits all.

Features

The UTM Face Mask was designed and developed in conjunction with military and law enforcement customers to be worn while using the UTM Man Marker Round (MMR) during Force-on-Force training. It was specifically created to work with Ballistic Helmets and allow for proper cheek/stock weld of shoulder fired weapons. The UTM Protective Face Mask offers face and throat protection that is light wearing, breathable, fully flexible and adaptable to all conditions and environments.

- Light weight, allows full range of motion with excellent vision.
- Breathable construction, unrestrictive airflow.
- A chin Strap extender is available for the Ballistic Helmet for use with this mask.
- Enables the user to obtain a full stock weld allowing the full use of iron or electronic sights on the weapon.
- Full head protection is achieved when used with the required goggles and ballistic helmet (recommended helmet, US Army's PASGT/ACH or MICH).
- Adequate space for radio equipment, ear and throat microphones.
- Unrestrictive hearing.
- Does not alter head and equipment spatial relationships in training unlike fully enclosed training helmets.

European Patent number: 1228342 additional patents pending. US patent numbers: 6253682, 6371028, 6427600, 6095051, 6378439, 6422149, 6415718, 6564719 UTM, Ultimate Training Munitions, and the "Breech" logo design are trademarks belonging to UTM Ltd.

TECHNICAL DATA & USAGE SHEET

FACE MASK

Care, Cleaning and Maintenance

The UTM Protective Face Mask is intended to be issued as an item of Personal Protective Equipment (PPE). The Face Mask must be cleaned and sanitized upon completion of training.

- The Face Mask cannot be properly sanitized by the use of the disinfectant wipes or sprays. The recommended cleaning method to adequately sanitize the Face Mask is through washing with the use of domestic washing detergent.
- Prior to washing, firmly close the mask's velcro panels. Closing the velcro will prolong the life of both the mask and the velcro panels.
- Wash the mask at 40°C/104°F (warm) with domestic washing detergent.
- To prevent possible damage from incorrect heat settings it is recommended the mask is not tumble dried and that it be allowed to air-dry/line-dry.

Usage Guidelines

- Intended only for supervised training conducted in accordance with UTM safety training protocols by law enforcement, military or professional training and security organizations.
- Verify that all PPE is correctly fitted, ensuring there are no exposed areas of the skin.
- UTM assumes no responsibility for injuries, loss or damage resulting from misuse of this or any of its products.

WARNINGS

- UTM approved eye protection (Goggles) must be worn in conjunction with the UTM Face Mask to achieve adequate personal protection for Force-on-Force Training Exercises conducted with UTM Man-Marker Rounds.
- Do Not use bleach, Do Not Dry Clean, Do Not Tumble Dry and Do Not Iron the UTM Face Mask.
